Monthly Report of MATRIX in May

Technology Development

5.10

Determined delegate node selection mechanism, code development in progress. This selection network will become the basis for the MATRIX main network consensus mechanism.

Restructured official github directory, added new targeted content repositories readily available for all technology enthusiasts to read.

5.13

Determined the interaction mechanism between network layer and consensus layer.

Standardized R&D staff onboarding documentation to ensure quick and efficient integration into project.

5.15

Uploaded code for AI-based graphic classification to github. This technology will be vital for MATRIX's future endeavors relating to image recognition, smart cities, medical diagnosis and more. Completed Go-language package encryption and testing; Completed consensus algorithm implementation scheme.

Determined smart contract R&D roadmap, completed functional requirement plan.

Implemented sm2/sm3 based C-interface code into encryption/decryption functions, testing passed; Completed Go-language demos.

5.25

Consensus: Fully support the generation of computing power output network.

Consensus: Generate verification node network and status updates.

P2P network: completed 3 sections, currently debugging. Includes: periodic broadcasts of selection information, receipt of delegate node selection results followed by node addition to global list; periodic refresh of global lists and removal of dropped nodes; broadcast of both the block and the global list following successful mining.

5.26

Encryption/Decryption: Completed 90% of basic coding work. Multi-node handshake currently fails when networked. Problem already identified and is being resolved. Marketing activities.

Marketing Activities

5.3~5.4

MATRIX core team streamed a live Q&A/AMA on YouTube to elicit community votes for listing on HADAX exchange.

5.14

Shot core MATRIX team introduction videos.

5.16

MATRIX CEO Owen Tao interviewed by He Caijing media. Discussion centered around how blockchain and artificial intelligence will shape the future of the Internet.

5.18

MATRIX CEO Owen Tao interviewed by He Caijing media. Discussion centered around how blockchain and artificial intelligence will shape the future of the Internet.

5.24-5.26

MATRIX team attended Blockchain Festival Vietnam, hosted community Meetup.

5.25

Held first Matrix Bayes Research Fund academic activity: MATRIX Chief AI scientist Steve Deng attended.

MATRIX interviewed by Nami TV and SME Magazine in Vietnam. Nami TV will publish interview this week, technical magazines in Southeast Asia will publish articles about MATRIX in July.

5.26

ChainBS conducted an exclusive interview with MATRIX CEO Owen Tao, CTO Bill Li, and Chief AI scientist Steve Deng. Discussion centered around how to integrate AI with blockchain technology. Interview indicated that MATRIX is unique in its ability to combine hardware and software due to its core team's experience in AI, communications and chip industries.

MATRIX co-organized the "Awaken the power of the 'Yuan' to touch the future" strategic cooperation Meetup alongside Elastos, TrustNote, Achain, Aurora and BIT.GAME. The Meetup was held in the Beijing National Aquatics Center (colloquially known as the "Water Cube.") MATRIX CTO Bill Li attended and delivered a speech.

5.28

Jinse Caijing interviewed MATRIX CEO Owen Tao, CTO Bill Li and Chief AI scientist Steve Deng. Topics touched on MATRIX's overall architecture, the integration of blockchain and AI technology, as well as the development ecosystem.

5.1~5.31

Several websites and media outlets, including Jinse Caijing, Toutiao and Yesky, reported on MATRIX's progress.

Overseas media outlets, including CCN, The Merkle, Blockonomi, Trustnodes and Coinspeaker, reported on MATRIX's progress.

Community Building

5.1~5.31

Actively worked on selecting Turkish, Korean, Vietnamese and Dutch community KOLs.

5.13

Japanese community KOLs (Mr. Hoonieman and his team) visited MATRIX headquarters to learn more about MATRIX. Visit informed cooperation model and Japanese community engagement plan.

5.20

American community KOL (Keith) determined North American cooperation model and engagement plan.

5.26

Community Meetup held in Vietnam. More than 250 fans attended. MATRIX's Vietnamese community has already exceeded 10,000 fans. This particular Meetup also attracted MATRIX community fans from the US and UK. Binh Duong, UR UNIQ project manager, attended.

Strategic Ecosystem

5.1~5.15

Strategy: MATRIX and KOCHAVA have entered into a strategic cooperation agreement. KOCHAVA is a leader in digital mobile advertising data measurement, attribution and analytics. KOCHAVA helps top brands grow using data. KOCHAVA operates the only tracking platform in the blockchain industry that can track advertising effectiveness. Additionally, MATRIX is also working on entering into a strategic cooperation agreement with Loyakk. Loyakk is a blockchain-powered enterprise relationship management platform for businesses to connect, collaborate, interact and exchange data with their various partners and consumers within their own business network (aka Value Web). Enterprises can leverage automated processes to create value via smart contracts.

Ecosystem: MATRIX signed strategic cooperation agreement with IDA, a global leader in asset digitization and tracking. MATRIX will begin with the Laos virgin forest project and continue to provide asset digitization support and solutions for future Belt and Road projects.

5.26

MATRIX, Elastos, TrustNote, Achain and Aurora announced that they have jointly initiated and established the META Union. The union will focus on blockchain research, attracting more blockchain talent, endorsing blockchain applications, providing blockchain solutions and promoting blockchain infrastructure and development ecosystems.
